DHA'RWA'R.

Area.—In 1885 an area of 68 square miles was transferred from the Bádámi táluka of the Bijápur district to the Ron táluka of this district. This change and the measurement of the survey carried out in 1874—1902 has increased the area of the district from 4,531 to 4,604 square miles. The táluka variations are :—

Bankápur	...	... + 1

The cultivated area by tálukas shown in the revenue accounts for 1910-11 is :—

Important Public Works.—The Southern Marátha Railway, which runs through the district dividing into two branches at Hubli, was opened between 1884—86. One branch connects Poona and Bangalore, from which a second runs north from Hubli to Hotgi through Gadag and Bijápur. In 1910-11 there were 272 miles of metalled road and 539 miles of road suitable for fair weather traffic

in the district. The new roads and works of importance constructed since 1875 are as follows :—

Factories.—In 1911 there were three cotton spinning and weaving mills with an average number of 2,037 hands employed daily, working 60,484 spindles and 514 looms. Besides these, there were in the district 22 cotton ginning, cleaning and pressing factories and a Railway workshop at Gadag.

Famine.—In 1891-92 there was slight scarcity in the district, which was tided over without recourse to elaborate measures of relief. Partial famine occurred in 1896-97, mainly due to failure of crops in the affected tracts, from the want of seasonable rain. The area affected was 857 square miles. Relief works were opened and continued for 14 months. The maximum daily average number relieved was 4,444 in September. Slight scarcity in 1899-1900 led to the opening of relief works, but they were practically unattended, only 256 persons being employed at the worst season. In 1900-1901, 357 square miles were slightly affected. Relief works were opened in February with a daily average of 360 workers, which rose to 1,892 in May. The number gratuitously relieved was 171 in April 1901. Since then the district has remained unaffected by famine.

Plague.—The first outbreak of plague occurred in the city of Hubli in November 1897, and the infection spread with rapidity. Throughout September, October, November and December 1898, the Dhárwár district suffered from the severest epidemic recorded since the beginning of plague in September 1896. The infection was carried to Gadag in November 1898, over 320 places being affected by the epidemic. The district suffered very severely from 1901 to 1905; thereafter followed a period of comparative quiescence until in 1911-12 there was a most disastrous recrudescence of the epidemic.

Unskilled labourers are paid annas 4 per diem and skilled artizans 8 annas ordinarily.

The only village in the State where there is forest is Mulkeri, covering an area of 1,140 acres. The forest produce consists of bamboos and grazing, yielding an annual income not exceeding Rs. 300.

Trade.—There is no trade of any importance in the limits of the State. The only industry existing in the State is that of weaving coarse cloth, blankets, *lugdas* and *khans*. Cotton and especially *pán* leaves constitute the chief exports. The traffic in *pán* leaves has assumed large proportions since the opening of the Southern Maratha Railway. They are exported to distant parts of India such as Karáchi, Delhi and Láhore.

Important Public Works.—The chief works constructed since 1875 are given below:—

Famine and Plague.—In 1899-1900 the rainfall was deficient and the outturn of all crops very poor. The ryots of the State however benefited by being able to sell their old stocks of grain at high prices to meet the demand for export to the famine-stricken parts of the Presidency. In the subsequent two years the two villages Kalival and Shiddápur suffered from insufficient rain. In November 1898 plague first appeared in the village of Jekinkatti. Since then the mortality from plague in the State has been:—

There is one municipal town, Savanúr, with an annual income of Rs. 4,719, chiefly derived from a house-tax.
